Statement of facts concerning Macon County Commission Chairman Louis Maxwell by Frank R. Dillman, 2273 County Road 54 West, Notasulga, AL 36866

The Macon County Commission has continuously refused to provide me the 2018 budget since September 2017. The commission has also refused to provide a copy of the county garbage ordinance for months. Their deliberate actions will hinder my candidacy for the Macon County Commission, thereby using their offices to ignore the law for personal gain.

Before convening the first 2018 budget workshop, Chairman, Macon County Commission Louis Maxwell reluctantly granted my request for a copy of the 2018 budgetary work papers. Immediately upon convening the meeting, the commission went into Executive Session upon Chairman Louis Maxwell declaring its purpose as to "discuss" the county open record policy. I was the only citizen in the audience.

Upon reconvening the meeting and my arrival back into the chamber, the chair demanded the return of the budgetary papers granted before the Executive Session. My request to purchase the copy prior to surrendering it was rejected by the chair without discussion from the commissioners including District 4 Robert "Mike" Berry who is my commissioner and opponent. As required by law, no explanation was provided with the denial. My subsequent requests for an electronic copy of the budgetary work document and the approved budget are unfulfilled and without a required explanation. The FY2018 budget has been in place for 10 of the 12-month accounting period.

While campaigning, I recently spoke with a resident who may be eligible for a waiver on his quarterly garbage fee. I told him I would look into whether he is eligible for the waiver and get back with him. A few days later, I visited and asked the Compliance Office for a copy of the ordinance, who immediately called the chair and my request was denied.

I walked over to the courthouse and told the chair why I wanted the ordinance. He reassured me he would send a copy to me. About two week later, on May 13, I emailed him asking for the ordinance, of which I could not locate on the county or the Secretary of State's web sites. I never received an acknowledgement to my email, the ordinance, or a justification for denial as required by law.

During public comment of the June county commission meeting, I again verbally requested a copy of the ordinance from the chair. At which time my opponent asked why I wanted it. Knowing by law, I was not required to answer his question; I replied that I was helping a resident to determine if he may be exempt from garbage payments.

Berry looked at me and told me that I should not be using county business for my campaign and I should do as he does, give the citizen the Compliance Office telephone number and direct them to call the office. The chair again said he would get me a copy.

On July 9, 2018 during another county commission meeting, I publicly gave the chair a written Open Records request using the county's form for the ordinance.

In the garbage ordinance situation, I suspect my commissioner and the chair may be colluding to affect my campaign by the use of their offices.

To date I have yet to receive the electronic copy of the 2018 budgetary work package, the approved budget, or the ordinance.

The county's violations of Open Records Law and Section 21 of the 1901 Alabama Constitution are a long battle going back more than three years. However, I feel these two instances are clearly deliberate to use their offices to harm a law-abiding citizen and candidate.
